

"Secure, Decentralized, Revolutionary – Welcome to the **EAGLEX** Ecosystem"

Welcome

# About Us

The **EAGLEX** ecosystem is a dynamic and ever-evolving platform centered around digital currencies and blockchain technology. It encompasses a wide range of components, including cryptocurrencies, blockchain platforms, decentralized applications (Dapps), crypto wallets, exchanges, and more.

# Blockchain

**EAGLEX** Blockchain is an advanced technology designed to store and exchange data on a peer-to-peer (P2P) network. In essence, blockchain operates as a decentralized, distributed ledger—a powerful system where data is shared among multiple participants. This distributed nature means that all users within the network can independently verify.

By allowing data to be maintained across a shared network, **EAGLEX** Blockchain enhances transparency, security, and reliability. Each transaction or data entry within the blockchain is recorded in a secure and permanent manner, making it accessible for verification by all participants. This decentralized approach ensures that data integrity is maintained, as each change to the ledger requires consensus among network members, significantly reducing the risk of fraud or manipulation.

# Crypto Currency

Cryptocurrency is a digital or virtual currency that relies on cryptography for security and functions on decentralized networks powered by blockchain technology.

# Vision & Mission

The **EAGLEX** Ecosystem is a comprehensive platform designed to empower you to take control of your financial future. With a focus on safety and security, **EAGLEX** aims to revolutionize how you earn and invest, offering a full suite of digital currency solutions. Our platform provides innovative, secure, and user-friendly products and services, all tailored to meet the needs of a community-oriented experience.

# Innovations

**EAGLEX** Innovation is dedicated to advancing and creating cutting-edge technologies in the cryptocurrency field. With a strong emphasis on research and development, our engineers and experts consistently push the boundaries of possibility in this dynamic industry. Leveraging blockchain, cryptography, and AI, **EAGLEX** Innovation develops transformative products and services designed to shape the future of cryptocurrency.

# Road Map

## EAGLEX Ecosystem

The EAGLEX ecosystem is the interconnected network of technologies, platforms, applications, and users supporting cryptocurrency and blockchain growth.

## EAGLEX COIN (EGX Coin)

The EAGLEX Coin serves as the native utility coin within the EAGLE X ecosystem.

## EAGLEX Wallet (EX Wallet)

The EAGLEX Wallet lets you securely store, manage, and transfer your digital assets with ease.

## EAGLEX Swap (E Swap)

An EAGLEX swap refers to the process of exchanging one cryptocurrency for another

## EAGLEX Exchange (Eagle Trade)

Trade Exchange is our self-operated platform that enables seamless trading of any crypto currency pair with liquidity,

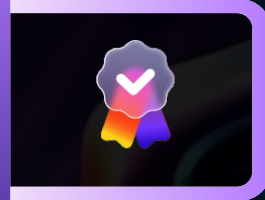

A large, stylized eagle with spread wings is the central focus. It has a blue and white head, yellow beak, and colorful feathers. It is holding a glowing blue rectangular sign with the word "EAGLE" in white, bold, sans-serif capital letters. The background is a sunset or sunrise over a city skyline, with several gold coins floating around the eagle.

# Road Map

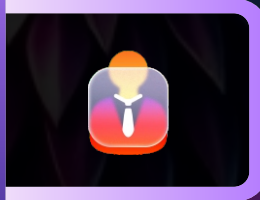

## EAGLEX X Bot

X Bot could refer to a cryptocurrency-focused bot designed to help users with various tasks related to cryptocurrency management

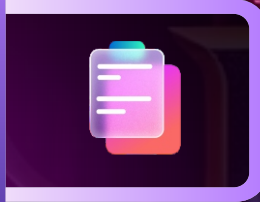

## EAGLEX Blockchain

The EAGLEX Smart Chain, a key component of the EAGLE X ecosystem,

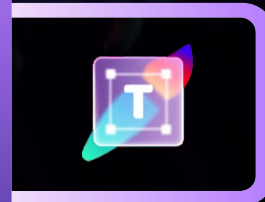

## EAGLEX Scan

EagleX Scan is a free, open-source explorer for Eagle Blockchain, enabling real-time analysis and interaction.

## EAGLEX Smart Contracts

Smart contracts operate on decentralized blockchain networks eliminating the need for a central authority

# Road Map

## EAGLEX Token Development

Choose the Eagle blockchain platform where your token will operate.

## EAGLEX Pay (X Pay)

"EAGLEX Pay" generally refers to a feature that enables payments using crypto currencies like Bitcoin, Ethereum, and other digital assets.

## EAGLEX NFT

"EAGLEX NFTs are digital assets that certify ownership or verify the authenticity of unique items or content, typically stored on a blockchain.

## EAGLE X Metaverse

EAGLE "metaverse" refers to a collective virtual space where users can interact, socialize, work, and engage in various activities through digital avatars and environments.

## EAGLEX Blockchain Api

Blockchain APIs allow developers to interact with blockchain networks to build apps, retrieve data, and perform various operations.

# Road Map

## EAGLEX Cap (Lex Cap)

EAGLEX Cap might be shorthand for the market capitalization of a specific cryptocurrency

## EAGLEX Hardware wallet

Hardware wallets are physical devices that store private keys offline, providing a secure way to manage and protect cryptocurrencies.

## EAGLEX Decentralized Apps

Decentralized Applications, commonly known as DApps, are applications that run on decentralized networks, typically leveraging blockchain technology.

## EAGLEX Eusd stabil Coin

A stable coin is a crypto currency created to maintain a steady value, typically linked to a reserve asset or a mix of assets to ensure stability.

## EAGLEX Noise View

"Crypto Noise" often refers to the overwhelming amount of information, rumors, hype, and misinformation that surrounds the cryptocurrency space.

# EAGLEX

# Road Map

## EAGLEX Arrival

In the context of cryptocurrency, "Crypto Arrival" could refer to the increasing mainstream acceptance and adoption of cryptocurrencies.

## EAGLEX Evocative

In cryptocurrency, "crypto evocative" refers to the qualities of crypto that spark curiosity, intrigue, and strong emotions, capturing the imagination of a global audience

## EAGLEX Hello Eagle

"Hello Eagle, where innovation meets the future of finance!"

## EAGLEX Speeder

Crypto Speeder is designed to execute cryptocurrency transactions at high speeds, enabling instant buying, selling, and transferring of coins to minimize delays and improve trade outcomes.

## EAGLEX Greatest

Crypto Greatest offers users a fast, secure, and seamless cryptocurrency experience with advanced features for managing digital assets.

# Road Map

## EAGLEX EX Smart

Crypto EX Smart offers a secure, user-friendly platform for managing cryptocurrency transactions and investments with advanced features and seamless integration.

## EAGLEX X Card

"EAGLEX Card: Your gateway to seamless digital transactions, merging the power of crypto with the convenience of a card.

## EAGLEX Block.com

The term could also refer to a block in blockchain technology, which is a fundamental part of how cryptocurrencies function

## EAGLEX E face

A platform that offers a secure and interactive digital identity for cryptocurrency users, enabling them to manage wallets, transactions.

## EAGLEX More Blockchain Service

There are various blockchain -based services and applications that extend beyond cryptocurrencies.

# EAGLEX Coin

## EGX Coin

The **EAGLEX** Coin serves as the native utility coin within the **EAGLEX** ecosystem. Built on the BEP20 standard and supported by blockchain technology, **EAGLEX** operates on the Binance Smart Chain (BSC) platform, designed for creating and issuing tokens efficiently and securely. With a fixed supply of 1.5 million coins, **EAGLEX** ensures no additional coins will be minted, maintaining scarcity.

## EGX ICO

ICO Referral Bonus = 5%

Minimum Buy EGX Coin = 10\$

Minimum Sell EGX Coin = 10\$

EGX Coin ICO = 10%

Tier	EGX Coin	Price	Days
1.	5,000,000	0.0026 USDT	10 Days
2.	5,000,000	0.0056 USDT	10 Days
3.	5,000,000	0.0083 USDT	10 Days

# EX Wallet

- ◆ The **EAGLEX** Wallet lets you securely store, manage, and transfer your digital assets with ease.
- ◆ It supports a wide variety of crypto-currencies, including Bitcoin, Ethereum, Dogecoin, and more.
- ◆ Designed with both simplicity and security in mind, the **EAGLEX** Wallet offers a user-friendly experience.
- ◆ You can easily create or restore your wallet using a straightforward 12-word recovery phrase.

- ◆ Secure Storage
- ◆ Highly Secure
- ◆ Wide Cryptocurrency Support
- ◆ User-Friendly
- ◆ Easy Wallet Recovery

# EX Wallet

## An Overview and Working Style

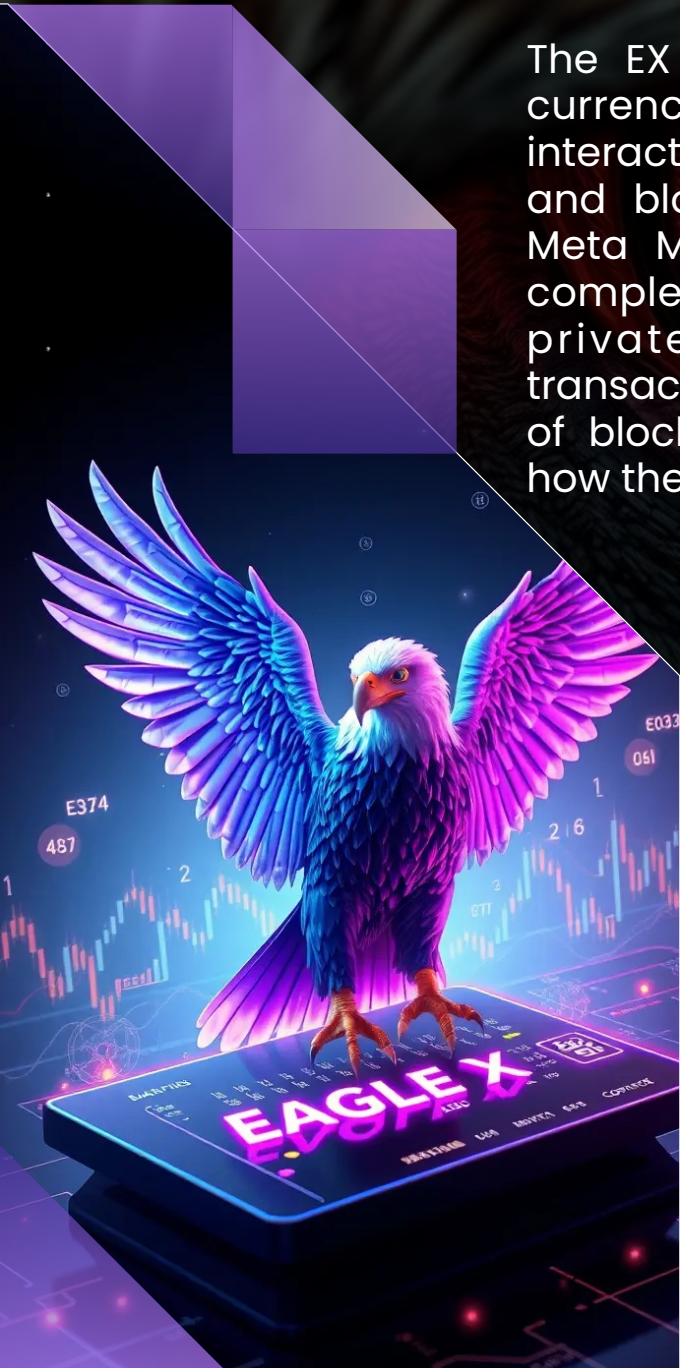

The EX Wallet is a versatile and secure crypto currency wallet, designed to provide seamless interaction with decentralized applications (dApps) and blockchain networks. Like Trust Wallet and Meta Mask, EX Wallet ensures that users have complete control over their digital assets and private keys, allowing for secure storage, transaction management, and access to a variety of blockchain services. Here's a detailed look at how the EX Wallet operates.

### 1. Core Functionality

EX Wallet is a non-custodial wallet, meaning users hold the private keys and thus retain full control over their funds. This self-custody feature prioritizes security, ensuring that no third party, including the EX Wallet team, can access a user's assets.

### 2. Key Features

- I. Multi-Chain Support:
- II. dApp Browser:
- III. Staking and Mining
- IV. In-App Token Swap:

# EX Wallet

## An Overview and Working Style

### 3. User Interface and Usability

EX Wallet is designed with a clean, intuitive interface that ensures ease of use for both beginners and seasoned cryptocurrency users. With a user-friendly dashboard, transaction history, and easy navigation, users can efficiently manage their digital assets and access key features.

**On boarding and Setup:** Setting up EX Wallet is simple and quick. Users only need to create a secure backup phrase and confirm it, granting access to the wallet. This non-custodial setup ensures user security and privacy.

### 4. Security and Privacy

Security is at the heart of EX Wallet's development. With private key management, biometric verification, and optional two-factor authentication, the wallet offers multiple layers of protection. Users can also manage their seed phrases directly, ensuring complete control over wallet recovery.

## ICO Coin Staking & EGX Coin Free Mining:

### Terms and Conditions

1. Mandatory ICO Coin Staking for Free EGX Coin Mining
2. 5% Dividend on Staked ICO Coins
3. Daily Coin Mining: Follow the Provided Mining Schedule
4. Minimum 3-Month Staking Period for EGX Coin Mining

# EGX

## ICO Coin Staking & Mining

Tier	EGX Coin Staking   5%	EGX Mining
1.	10,000 EGX	30 EGX/Day
2.	25,000 EGX	70 EGX/Day
3.	50,000 EGX	150 EGX/Day
4.	1,00,000 EGX	400 EGX/Day
5.	2,50,000 EGX	1,000 EGX/Day

# EGX Coin

## Staking on External Wallets

**EGX coin** holders now have the opportunity to earn passive income by staking their coins on popular wallets like Trust Wallet and MetaMask. These platforms offer flexible staking options with annual returns ranging between 5% and 9%, making it a lucrative choice for both new and experienced investors.

# EAGLEX E Swap

An **EAGLEX** swap refers to the process of exchanging one cryptocurrency for another. This exchange is typically carried out on specialized platforms or services, which can be broadly categorized into decentralized exchanges (DEXs) and centralized exchanges (CEXs).

# EAGLE TRADE

EAGLEX TRADE

**EAGLEX** Trade Exchange is our self-operated platform that enables seamless trading of any crypto currency pair with liquidity, transparency, and efficiency. You can effortlessly swap, buy, convert, or sell crypto assets on **EAGLEX** without relying on intermediaries or centralized platforms. Enjoy low transaction fees, enhanced security, and rapid processing, all powered by block chain technology and smart contracts. **EAGLEX** is compatible with any wallet that supports WEB3 and block chain, such as MetaMask or Trust Wallet.

- ◆ **Self-Operated Platform:** **EAGLEX** is a decentralized exchange, operating independently without intermediaries or centralized platforms.
- ◆ **Web3 & Blockchain Support:** Compatible with any wallet that supports Web3 and block-chain, including MetaMask and Trust Wallet.

# EAGLE X Bot

The **EAGLEX** Bot is an advanced, cryptocurrency-focused bot designed to assist users with a range of tasks in cryptocurrency management. This intelligent digital assistant leverages the latest in blockchain and AI technology to provide seamless support across multiple areas of crypto, from monitoring market trends to managing digital assets securely.

# EAGLE X Pay

"**EAGLEX** Pay" generally refers to a feature that enables payments using cryptocurrencies like Bitcoin, Ethereum, and other digital assets. This functionality allows users to make purchases or transactions by using cryptocurrency wallets and platforms that support payments for a wide range of goods and services.

**Decentralized Framework:**  
Operates on decentralized networks, reducing reliance on third-party intermediaries.

**Secure Transactions:**  
Utilizes secure blockchain technology, ensuring safe and transparent transactions for users.

## EAGLEX LEX Cap

**EAGLEX** Cap might be shorthand for the market capitalization of a specific cryptocurrency or the entire cryptocurrency market. market cap is calculated by multiplying the current price of a cryptocurrency by the total number of coins or tokens in circulation.

- ◆ This metric provides insights into the cryptocurrency's size, its relative value, and its stability within the market.

# EAGLEX NFT

"**EAGLEX** NFTs are digital assets that certify ownership or verify the authenticity of unique items or content, typically stored on a blockchain. Each NFT contains distinct information, making it identifiable and different from other tokens. This uniqueness is often leveraged to represent digital art."

# EAGLEX Blockchain

The **EAGLEX** Smart Chain, a key component of the EAGLE X ecosystem, is a blockchain platform utilizing Proof of Stake (PoS) consensus. With the capacity to process thousands of transactions per second, the **EAGLEX** blockchain is an ideal solution for DApps that prioritize speed and affordability, including gaming platforms and decentralized exchanges (DEXs). Its high-performance infrastructure ensures fast and seamless transaction processing for a range of decentralized applications.

# EAGLEX Scan

EagleXScan is a robust and open-source blockchain explorer designed specifically for the EagleX Blockchain network. This powerful tool enables users to explore, analyze, and interact with the EagleX Blockchain in real time, providing a transparent view into the network's activities. With EagleXScan, users can track transactions, monitor wallet balances, review smart contracts, and gain insights into network metrics. EagleXScan offers various features including:

**Transaction Tracking:** Access detailed information about each transaction, from sender and receiver addresses to transaction amounts and gas fees.

**Block Explorer:** Browse through individual blocks to view transaction histories, miner information, and block confirmations.

**Smart Contract Interaction:** Analyze deployed contracts on the Eagle X Blockchain and interact with them directly through the explorer.

**Token Management:** View and manage tokens on the network, including token transfers and balance updates. **Network Analytics:** Access metrics and analytics for network health, including transaction volumes, average fees, and more.

# EAGLEX Token Locker

Tokenomics, or coin economics, is an emerging field focused on the economic dynamics of systems driven by agents who use cryptographic tokens. These tokens are generally created and managed on blockchain-based distributed ledgers, enabling new forms of value exchange and incentive structures.

**Definition:** Tokenomics, or "coin economics," is the study of the economic aspects and value-driving factors of cryptographic coins within blockchain ecosystems.
